Every operating theater is different - and we are prepared for it.

In addition to technically and hygienically high-quality wall-mounted consoles, operating theater field monitors and All-In-One computers, we offer a scalable software suite that allows us to implement customized solutions for the medical IT sector. Our team integrates research and development, production and sales, project planning and service under one roof. With over 20 years of experience in the medical market, we stand for quality, innovation and reliable service.

Innovation made by Rein Medical

We at Rein Medical drive innovation. Our German company with a team of 100 employees has been involved in medical IT for more than three decades. Today we are a system service provider that realize client-specific IT solutions from planning to handover, all from one source. We can also significantly accelerate the digital revolution in practices, clinics and other medical institutions. We provide individual All-In-One computer solutions, high-resolution displays, customized IT wall modules for operating theaters, as well video/audio and image management systems. Rein Medical has been a part of the JVC Kenwood Corporation since March 2018 and is a globally active company.

Full control and flexibility: Our SMART OR software streams all video, audio sources and OR images over the network. When images and videos are distributed, recorded or managed in the OR, SMART OR comes into play. SMART OR is the right choice, from the single-user solution, where image and audio data from a local source must be documented, to image distribution, archiving and streaming in complex networks.

The CLINIO Panel PC is a hygienic and versatile All-In-One PC that is ideally suited for medical environments. Thanks to the smooth surface and the IP-65 protected front, the CLINIO is easy to clean and disinfect. Each CLINIO can be individually manufactured (22", 24" or 27" sizes) and configured to your operational needs.

OUR SERVICE FOR YOUR PROJECT

AFTER SALES SERVICES

- > Support throughout the entire life cycle of the product
- > Annual service
- > Product maintenance and software updates & upgrades

CONSULTING

- > Presentation of products and solutions
- > On-site or virtual

- > Delivery, service, installation, cabling, hardware, software integration, etc.

Who are we?

At Rein Medical, we drive innovation. Our German company with a team of 100 employees has been involved in medical IT for more than three decades. Nowadays, we're a system service provider that implements customised IT solutions from planning to handover from a single source. We also accelerate the digital transformation in practices, clinics and other medical facilities. We develop and produce individual all-in-one computer solutions, high-resolution displays, customized IT wall modules for operating rooms as well as video/audio and image management systems. Rein Medical has been part of the JVC Kenwood Corporation since March 2018 and is a globally active company.

Quality through the international standard ISO 13485

Rein Medical is the proud holder of ISO 13485 certification, which demonstrates our high-quality standards and commitment to continuous improvement in quality management systems. The successful certification confirms our commitment to providing our customers with the highest quality products and services. We are proud to be able to back this up with a certified QM system.

Future „Made in Germany“

We stand for quality and set a hygienic benchmark with our certified IT. From the design, development and production of our hardware to the programming of our software, we realize our IT solutions at the Mönchengladbach site. With our worldwide partnerships, we offer innovative holistic solutions for an optimized workflow, ensuring smooth and reliable processes in the operating room.
